The Interesting Story of a Unique Business

FORTY YEARS AGO a youngster with an ingenious mind conceived the idea of building small houses in a new way — completely in sections, that could be shipped anywhere, that could be erected by anyone in a few hours' time without the use of nails — simply bolted together.

First factory built in 1892

Soon this ingenious young pioneer, Ernest F. Hodgson, built himself this small factory and equipped it with machinery. Thus was born the business that has grown in these forty years to such tremendous proportions.

This same inventive man, E. F. Hodgson, is still its active head.

Mr. Hodgson at first made small houses for all sorts of purposes — dog houses, poultry houses, tool houses; then one room camp houses, and soon came camps of several rooms.

But it was in the glamorous day of 1900, when that marvelous invention, the "horseless carriage," came into use that the business gained great momentum.

At that time came the demand for "Auto Stables," as they were called. The use of the automobile also brought an increased demand

Our factory in Dover, Mass., now turning out hundreds of Hodgson Houses each year. Shipped to all parts of the world

In the "Gay Nineties," Hodgson Camp House at Eliot, Maine

for the Hodgson camp and vacation houses. This demand for garages and camps came from all parts of the country, and indeed from many foreign countries. There are Hodgson houses in South Africa; in Jerusalem; in Greece; in Belgium; in Italy; in South America; in Nicaragua; in Honolulu; in Newfoundland; Labrador; and other foreign parts.

We know that many of the Camp Houses Mr. Hodgson first built are still in use. The famous actor, Denman Thompson, purchased one in 1905 and erected it in Swanzey, N. H. This house is still in use by his descendants, being in fine condition and bearing silent testimony to the enduring qualities of Mr. Hodgson's ingenious construction.

Another remarkable demonstration of the sturdiness of these houses, is in the one sent to the Grenfell Association at Indian Harbor, Labrador, many years ago. It stands today in a most exposed location, sturdily resisting the severe elements of that bleak coast.

Mr. Hodgson has kept in step with modern progress. Improvements in construction, materials and finish have been constantly made from year to year, so that today our houses are unique.

Hodgson Camp Houses at the Sportsmen's Show, Madison Sq. Gardens, New York City, in 1906

The few pictures shown in this article purchased in bygone days have an historical interest and demonstrate the originality of Mr. Hodgson's idea.

The illustrations of the houses being made today demonstrate the continued value of his achievement. These illustrations are from actual photographs, and will give you a very good idea of the appearance of our Camp Houses.

If you can call at one of our salesrooms or outdoor exhibits it will be a pleasure to show you the houses themselves.

E. F. HODGSON CO.

This Hodgson Camp of 5 rooms was exhibited at the Sportsmen's Show, New York, in 1906 and purchased there by Mrs. Nelson

After 28 years Mrs. Nelson, who erected this house at Moosehead Lake in 1907, wrote the letter on page 18

This Hodgson Camp House has many times been buried under six feet of snow

HODGSON CAMP HOUSES

THE CAMP HOUSES shown on pages 5 to 20 have been on the market for over forty years. They have an established reputation for durability and stability.

Our system of units makes it possible to easily and quickly erect a one room camp in an hour's time, and the largest one in a day or two, without fuss or muss; also to as quickly and easily add rooms at any time.

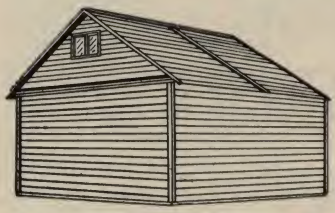

These houses are used for cottages, vacation houses, both summer and winter; school camps; overnight camps; guest or overflow houses; for many uses in large camps where small buildings are needed; also for play houses, skating houses, rest houses, storage houses, garages, etc.

These Camp Houses differ from our larger Hodgson Houses shown on pages 28 to 34 inasmuch as they are made only in 10 foot wide units, and the exterior is oiled with linseed oil instead of having three coats of paint.

They are made with single walls, lined with our special heavy fibre material. If desired, we should be pleased to quote prices with double walls, the inner lining to be Celotex.

Hodgson Camp House Construction

UNIT PRICES ON PAGE 8

A 10 x 10 foot house with ends. To this can be added more units with partitions, doors, windows, etc.

Made in Units. Easily and quickly increased in size.

With 40 years' experience in making unit built houses, we know that these Camp Houses are as practical as it is possible to make.

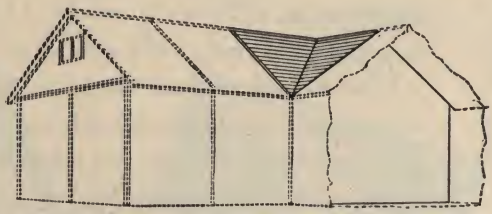

The Frames are of strong Oregon pine and cedar.

The Outside Covering is of enduring cedar, which will last a lifetime.

The Exterior Woodwork is dipped in tanks of linseed oil before being made up into sections.

All Outside Nails are hot-dipped galvanized and the hardware is either brass or cadmium plated, thus preventing rust.

Sections are bolted together with our special Wedge Key Bolts, an invention of ours dating back 35 years. We use thousands of these each year, saving our customers much expense in the erection of our buildings.

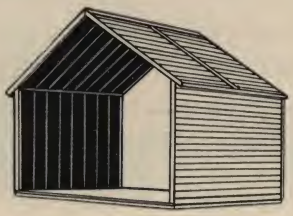

A valley roof section to turn the units a quarter turn

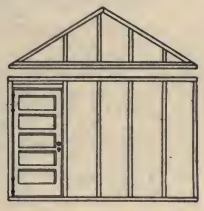

The Interior is lined with a heavy tan fibre, waterproof and windproof, making a very dry camp. The woodwork is stained walnut brown. The floors are hard pine.

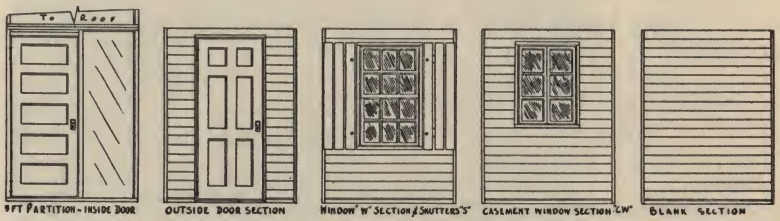

Our Wedge Key Bolts that make the houses go up like magic

A 5 x 10 or 10 x 10 additional unit to add to the first unit

A 10 foot Partition with peak and door

These sections are used in making up the side walls and partitions of all our camp houses

Partitions are made up of a cedar frame and covered with Celotex. They are furnished with or without peaks or doors.

The Panel Doors are of the best quality, with good mortised locks.

The Casement Windows have automatic adjusters and secure locks. Regular double hung windows have locks.

Floors, Roofs, Sides and Partitions are all made in sections with doors and windows installed, and are quickly Key Bolted together. A 10 x 10 ft. Camp House can easily be erected in an hour.

There is no Roofing Material to put on after the building is up.

The sections are shipped unpainted, but oiled. We can furnish paint, white or green, or Cabot's outside brown and green stains, which with treated cedar foundation posts are listed on Page 8.

8 x 10 ft. Clapboard side porch

End Porch to go on end of house only. It is 5 x 10 ft. or 10 x 10 ft.

Unit Prices etc. on Page 8

Side Porch to go on side or end of house. It is 4 x 10 ft. with additional 4 x 5 units, or 8 x 10 ft. with additional 5 x 8 ft. units

A Perfect Camp in Maine

"The camp is perfect in every way. We are delighted with it and everyone who comes admires it.

"This past Maine winter was a real test for any camp. This one passed 100 per cent, just as dry as could be when we came down here the last day of March."

Finely Constructed

"We received the house in perfect condition, and it gives me great pleasure to tell you that we are greatly pleased with it.

"It is the only portable house in the vicinity, and is the center of attraction.

"My husband was especially pleased with the excellent construction, and the fine quality of the material."

(Mrs. Herman) Katherine Knaust
West Camp, N. Y.

Set Up in 3½ Hours

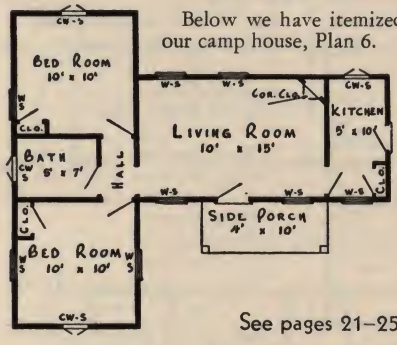

"I wish to take this opportunity of thanking you for the splendid manner in which the shipment arrived and also for its clarity of arrangement and packing. The erection was done by myself with the assistance of a carpenter farmer or sort of man of all work.

"The foundation posts had previously been set and the house was erected in about 3½ hours. Everything fitted perfectly and was easily done."

Moosehead Lake 18 Years

"I would like to say that the first Hodgson Houses I bought (it must be 17 or 18 years ago) are in just as good condition as when they were first put up. They have been here on Farm Island during the severe Maine winters.

"I was pleased to see the letter my son-in-law (Mr. John McEntee Bowman) wrote, in your catalogue."

(Mrs.) Myra D. Paterson
Husted Lane, Greenwich, Conn.

On Cape Cod 15 Years

"Please send me your latest catalogs and price list.

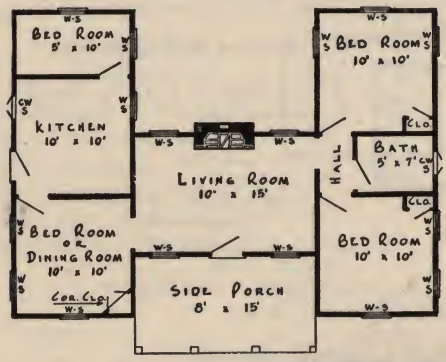

"About fifteen years ago I purchased one of your camp houses, for use on Cape Cod. It has stood there ever since, exposed to all extremes of wind and weather, receiving no attention except a coat of paint seven years ago.

"It has never leaked a drop and is as good and substantial as the day it was set up."

Key Bolts Are Time Savers

"Three of us erected the camp house in one day without running into any difficulty whatever. Your key bolts are worth ten times their weight in gold."

DYSON DUNCAN
241 West St., New York City

At Moosehead Lake, Maine, for 28 Years

"In the spring of 1906 I erected a five room Hodgson Portable House on the shores of Moosehead Lake. In the winter of 1908 the house was divided into two parts, and was carried by horses across the Lake on the ice, a distance of a mile and a half, to the location where it now stands.

"After all these 28 years, and being used each season, it is still one of the most attractive and well built camps on the Lake. There have been many additions, but the original house is as firm and solid as ever; wind, rain, and snow-proof, and delightful in summer.

"The enclosed picture is one taken in a recent snow storm, while we were as warm and comfortable as could be with wood stoves indoors.

"This is one of your first houses and was on exhibition at the Sportsmen's Show in New York, the winter of 1906. The wood inside has never been painted or varnished and still shows the beautiful colors and grains.

"I notice that you have used my letter for many years in your catalogue and it gives me great pleasure to add these few words of praise to a building which has so hospitably given shelter and protection to many occupants."

Cornelia L. Nelson (*Mrs. Thomas Nelson*)
1228 Constant Ave., Peekskill, N. Y.

At Moosehead Lake, Maine, for 12 Years

"I am very familiar with your houses, as I purchased four some ten or twelve years ago, and I am using them as a camp near Moosehead Lake in Maine. Some two years ago I was obliged to move my camp on account of the construction of a dam, which, when the basin was filled would drown me out, so I moved my camp down some five miles from the old location. This was done without marring the sections to any extent, and they were re-erected and now look as good as new.

"I want to let you know how much I appreciate the quality of the paint used on them, as during all this time only the roof has been repainted until this summer."

George R. Wallace
Fitchburg Paper Co., Fitchburg, Mass.

Located at Alexandria, Minnesota

"I may say that the cottage and garage, which you forwarded me, have been found to be highly satisfactory, as I found that everything you sent complied fully with your statements and representations, and I think the best statement I can give you is if I were to start again to build a summer cottage, I would repeat the order and use your cottage and garage as they have been entirely satisfactory in all respects."

Edw. H. Chandler
Tulsa, Okla.

Cool on Hot Days

"We have been entirely pleased with our little house. We use it only as a restful place to escape to for week-ends or a week at the most, but it is tight and cozy even in terrific downpours, and wonderfully cool in these hot days. We think your ventilating idea especially good."

RUBY DREW DOOLEY (*Mrs. P. C. Dooley*)
Fort Wayne, Ind.

At Hewitt, N. J.

"The house was erected with no sort of difficulty, by family and neighbors (unskilled labor) in less than a day.

"We are well pleased with the completed camp, and thank you for your courtesy in filling the order."

RUTH Z. TEMPLE
For DR. A. H. TEMPLE

Camp Easily Erected and Comfortable

"The Hodgson Camp House which I ordered from you on April 22nd has been erected and has proved very comfortable. We were pleasantly surprised at the simple erection and the solid appearance of the little cottage."

DONALD B. MATTHEWS,
Ward Manor, Red Hook, N. Y.

Camp Went Up Easily

"Mr. Hayden and I wish to express our great satisfaction with our new Hodgson House delivered two weeks ago at Sterling Forest, N. Y.

"It went up easily over the week-end, though we were all novices at house building. The parts fit accurately and the house more than meets our expectation."

A Hodgson Camp House Painted

A Camp of Neat Workmanship and Finish

"I am greatly pleased with the camp house that I purchased from you in August. Not only am I pleased with the design, but especially pleased with the quality of the material and the neat workmanship and finish. I am now considering enlarging the house."

C. H. Strange,
Mining Engineer, Pottsville, Pa.

Pleasure to Erect a Hodgson Camp

"I consider your cabin one of the cleverest pieces of carefully designed and executed workmanship I have ever seen. I got so much fun out of its erection that I told my wife I had a notion to take it all down for the pleasure of putting it up again!"

Court Yard of a Hodgson Cottage

Hodgson Houses

For forty years Hodgson Houses have held a unique position in all parts of the world. Their inviting simplicity and harmonious lines appeal to people of good taste; and thus, with their attractive and well-planned interiors, they have given enjoyment to people, in all sorts of circumstances, in all sorts of climates, under the most trying conditions.

The construction is simple. Made of enduring red cedar, in completely finished sections with windows in place, doors hung — in fact, all carpentry work and painting completed at the factory; and even the hard pine floors are sanded and shellacked before shipping; so that the houses are quickly erected by local labor; or by our factory men.

Thus the purchasers of Hodgson Houses are saved much time, expense and the confusion and many worries connected with building operations.

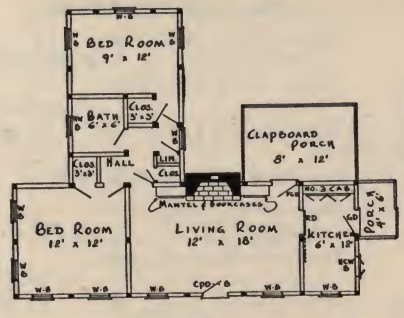

The Single Wall Construction (Fibre Lined) shows the frame on the inside, with a background of heavy waterproof fibre lining next to the cedar boarding.

The Double Wall Construction (Arctic Lined) is the same as the single wall with the addition of Arctic Board (Celotex) on the inside frame; on side walls, roofs, floors and partitions, giving a double wall with an air space between—more comfortable in coldest weather than a well-built plastered house.

If interested in one of these larger houses send for our large catalog showing many pictures of our houses and plans.

Denman Thompson's Cottage, Erected in 1905

"Last summer you were kind enough to send me catalogs of your charming Hodgson Houses. I was particularly interested to see a cut of the little cottage which you sold to Denman Thompson, which is located on our property which we bought from his descendants. Indeed, that little cottage is the most popular of all the sleeping quarters."

Care in Constructing, Shipping and Erecting

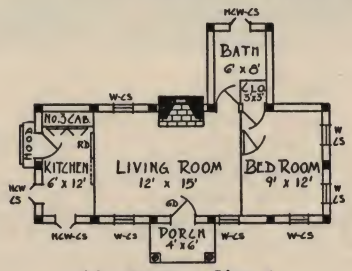

"I enclose check in payment for the Hodgson House which you recently sent me.

"The house is, of course, up and established by now, and I want to let you know that I am very much pleased with it and with the obvious care with which it was constructed, shipped and planned for erecting."

Used Throughout the Year

"My house has been absolutely satisfactory and I have never done business with any concern with whom it was pleasanter to deal. Your company not only did all that you promised, but more, and everything about the house was better than I expected."

ROGER AMORY

Troy, Turkey

"Your letter of September 15th has reached me, having been forwarded from Athens. I am enclosing three photographs of the Hodgson house which we set up on the plateau beside the Hill of Troy, Turkey, last spring.

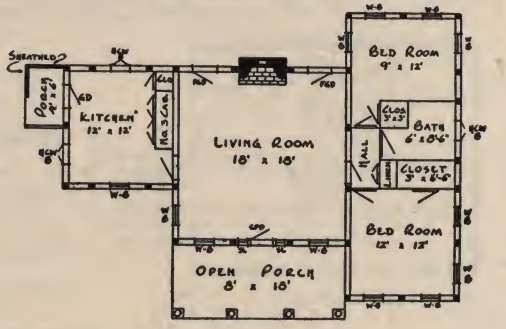

"The house is very comfortable and satisfactory, and we consider ourselves fortunate in being so well installed."

Hodgson Cottage at Lake George, N. Y.

"The Hodgson Cottage I now have has been in use for the past three or four years, and has given me such excellent satisfaction and comfort that I would not consider going elsewhere now that the question has come up for me to move to another location, making it necessary to buy another house.

"The house is erected at Lake George, where, as you well know, we have very severe winters, but it has come through admirably — never leaks a drop of water and is apparently in as good condition now as the day it was erected."

EVANGELINE BOOTH,
Commander-in-Chief.

Hodgson Houses Make Comfortable Homes

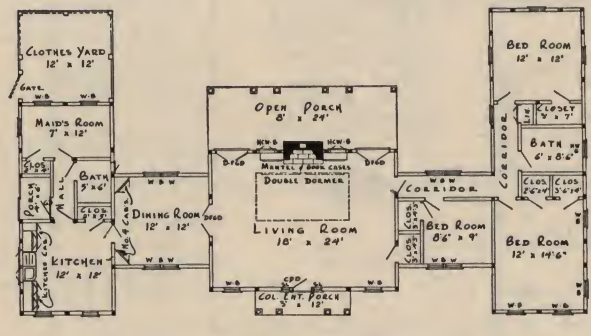

"During the cold wave of the week of Dec. 26, 1933, when the temperature was less than ten degrees below zero, my Hodgson House was at all times comfortable. To the best of my knowledge, the temperature never fell below the thermostatic control of 58–60 degrees at night and 68–70 degrees in the daytime.

"Considering the fact that previous checks show that I burned less coal than my neighbors for the same size house, I consider the above record a great tribute to the construction and insulation of the Hodgson House."

"It is with great pleasure that I recommend the use of the Hodgson House, as my own has given perfect satisfaction in every way.

"As I wrote you previously, I equipped this house with a brick base, putting a cellar under part of it, and air space under the balance. I use a steam heating plant, so that the house is as comfortable in the winter season as it is in the summer — being warm in one case and delightfully cool even on the hottest days."

Hodgson Bird Houses

OUR bird houses are attractive and practical. Being well made of red cedar, and well painted, they will last for years. They can be easily opened up for spring house cleaning, which should be done each season before nesting time. Many of the larger bird houses represent the several types of old New England homesteads so well known and appreciated, and add much to the attractiveness of any grounds. These are the first five houses shown and are for Martins and birds of the Swallow family.

Dutch Colonial Bird House — 24 x 40 inches — 32 rooms — 16 ft. Pole — Price $35.00, Without Pole, $30.00

Attracts Martins

"Last year I bought one of your Villa Bird Houses. On April 10th Martins came and looked it over and were pleased with it. I have counted as many as 60 Martins around the house. Later Flickers raised a family in the attic. The openings are a little small for Flickers but they pushed in and I allowed them to stay. Many people stop to look the house over and we are pleased with it."

CHARLES W. MACK

Attracting the Wild Birds

Up to within recent times many who provided care, food and shelter to our wild birds did so from humanitarian motives and the pleasure to be had from having them in their grounds and around their homes. But today we are realizing more and more the great value of the wild birds in protecting our shrubs, trees, orchards, crops, etc., from the awful horde of insect pests which invade our gardens and cause losses of untold amounts each year; and so the wild birds are now most enthusiastically catered to and sought after creatures.

Colonial Bird House — Price Complete, $25.00
26 x 33 inches — 28 rooms — 16 ft. Pole
Without Pole, $23.00

In winter we have only to offer food to the birds to attract them. Shelter and protection will keep them. In summer they must have protection and a home — nature will provide food in the summer, which consists mainly of insects, bugs and worms.

They must have a place to drink and bathe both in summer and winter. Birds long absent from a neighborhood will find their way back soon after provisions for their comfort are made.

Martin Special — Price $18.00
18 x 21 inches — 6 large rooms (for pairs)
20 ft. Pole — Price without Pole $14.00

Old Homestead Martin House — 21 x 22 Inches — 10 Rooms — 16 ft. Pole. Price $12.00; Without Pole $10.00

LARKIN CO., INC., BUFFALO, N. Y.

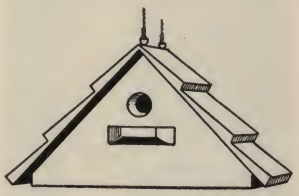

"The Bungalow Bird House arrived last week. I thought you would be interested to know that before I had finished setting the pole in the ground there were a dozen swallows flying around to make an inspection of the house. They seemed to like it very much.

"I get a lot of pleasure out of watching these swallows and I now have three houses full of them. Not only are they fun to watch but they destroy the swarms of bugs of which there are many in this region."

Hodgson Sectional Greenhouses

THESE greenhouses are made of the best quality of red cedar, cypress and Oregon pine. They are thoroughly painted with the best lead and oil paints; being bolted together, the erection is quickly accomplished by a "handy" man.

The greenhouses are furnished with or without a heater room, as desired. When placed near a garage or house where heat can be supplied without an independent heater, the glass units only need be purchased, in which case a door is furnished in the end of the last glass unit.

The picture below shows the interior and layout of our Unit Greenhouses. There is a Potting Bench in the Heater Room and Plant Benches 30 inches wide by four inches deep along the two side walls and one end of the Glass Unit. Between the Plant Benches is a board walk, and under these benches are the four lines of hot water pipes. The Hot Water Heater is operated by coal and is automatically regulated.

The outfit is as complete and practical as it is possible to make it.

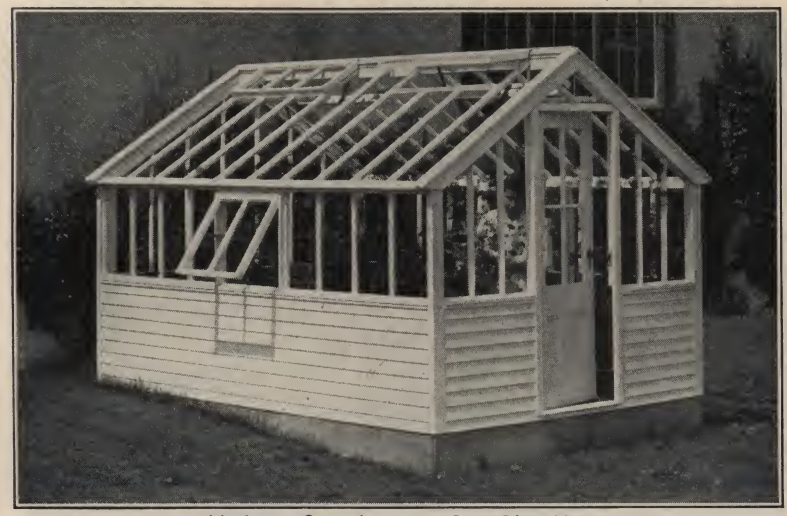

Floors: No floors are furnished with these outfits, for dirt, brick or cement are more practical than a wooden floor. Bricks simply laid in sand make an excellent floor.

Interior of a Hodgson Greenhouse

Glass: is only furnished when ordered. As the glass must be set after the building is erected, the purchaser has to have this done locally.

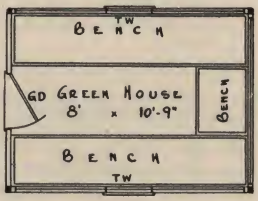

If Vitaglass is wanted, it costs three times the price of greenhouse glass.

Hodgson Greenhouse — One Glass Unit

Price without glass.....$185.00 Extra for glass.....$40.00

This picture shows a complete glass unit, having a door at one end. Such units are used when they are placed next to some building from which they receive their source of heat. If this is not possible, you should have one of our heater rooms as shown on pages 54 and 56 with an independent heater.

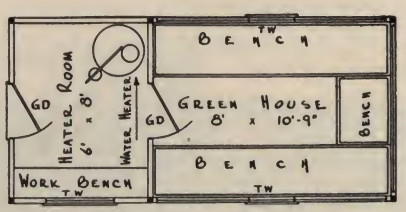

To this unit can be added a second unit of the same size for $110.00, plus glass $25.00.

The picture showing the greenhouse in the snow was taken on a zero morning outside, with a temperature of 60 degrees inside. One of these greenhouses will start many early plants to be set out after the frost is gone. The operating of our heating plant is very simple.

Hodgson Greenhouse — One Glass Unit and Heater Room

Price without glass . . . $270.00 Extra for glass $35.00
Price of Heater with all necessary pipes cut to fit 135.00
Price of Galv. chimney and smoke pipe installed 15.00

This picture and plan show a greenhouse of one glass unit and a heater room. To this can be added more glass units. The heater room is better shown on page 54.

Our hot water heater which burns coal and is automatically regulated, is very simple and easy to operate, consuming but little coal. Four lines of hot water pipes run around all sides of the glass unit, under the flower benches. There is much useful space under these benches for planting; and additional shelves can be installed above the regular flower benches, greatly increasing the greenhouse capacity.

Not a Pane of Glass Broken

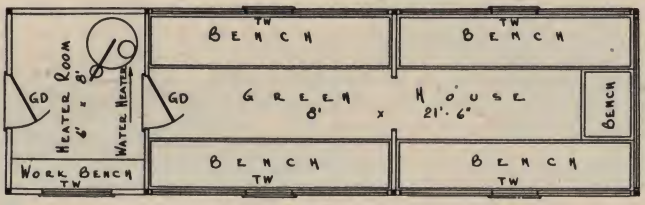

"My greenhouse is up in place and I am much pleased with it. Everything was well packed, not even a pane of glass was broken. My son, who lives in Long Island, is so pleased with my greenhouse that he thinks of getting one a little later on."

MARY R. BRAMAN (Mrs. C. R.)
The Knoll, Wyckoff, N. J.

Hodgson Greenhouse — Two Glass Units and Heater Room

Price without glass.....$380.00 Extra for glass.....$ 60.00
Price of Heater with all necessary pipes cut to fit.....153.00
Price of Galv. chimney and smoke pipe installed..... 15.00

Our regular size heater will easily heat these two units, but if you intend to add more units later we would recommend the use of our larger heater, which will heat up to four glass units. This would eliminate the expense of changing the heater should you enlarge the greenhouse. The larger heater would add $26.00 to the price of $153.00 quoted above.

A Great Pleasure

"Answering your letter of the 7th, I advise you that my greenhouse has proved in every possible way satisfactory, and I have had a great deal of pleasure out of it."

Grows Many Plants

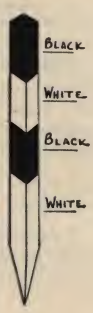

"The greenhouse has not only proved entirely satisfactory but is a prodigy of efficiency. All the flowers we can possibly use at Anchorhold and Friars Wood — many of our vegetables, and a great quantity to give away — are successfully started there. And it takes care of the rarer plants through the winter.

"It is hard to believe that so very much can come out of such a small greenhouse."

Blarney Kennels, John G. Bates, Owner

James St., Morristown, New Jersey

"It gives me great pleasure to write you and let you know that the large kennel and the cottage which I bought from you four or five years ago have given me complete satisfaction.

"They have withstood all weather changes and are in practically the same condition now as when erected."

JOHN G. BATES.

Hodgson Houses on our exhibition grounds at Dover, Mass., where visitors are always welcome

At Our Exhibits

All of our exhibits are extensive and comprehensive, each having at least one large, full-sized cottage, interestingly furnished; also camps and camp cottages; greenhouses; play houses; bird houses; kennels, both large and small; poultry houses; garden furniture, etc.

We hope you will be able to visit at least one of these exhibits and become acquainted with the Hodgson products.

However if you cannot call on us, the catalog is well illustrated by actual photographs, so that it is possible for you to make your selection from it and mail your order. Much of our business comes to us in this way.
